

ADARSH PRAKASAN

Software Engineer | Full-Stack Developer (MERN Stack)
Dubai, UAE | +971 55 821 6334 | adarshp2911@gmail.com
[linkedin.com/in/adarshprakasan](https://www.linkedin.com/in/adarshprakasan) | github.com/adarshprakasan

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with hands-on experience building and shipping production-style web applications using React.js, Next.js, TypeScript, JavaScript (ES6+), Node.js, Express.js, and MongoDB. Skilled in REST API design and integration, JWT authentication, role-based access control, database design, and responsive UI development. Delivered a full-stack hospital management platform covering authentication, scheduling, and real-time workflows, plus multiple independent projects spanning frontend, backend, and API integration. Combines a software engineering foundation with a UI/UX design background to build usable, accessible interfaces. Seeking a Full-Stack / MERN Developer role in Dubai, UAE.

CORE SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL, Python

Frontend: React.js, React Hooks, Next.js, Redux, Tailwind CSS, Responsive Web Design, UI/UX Design, Accessibility

Backend: Node.js, Express.js, REST API Development, API Integration, Authentication, Authorization, JWT, MVC Architecture

Database: MongoDB, Mongoose, SQL, Database Design, CRUD Operations

Tools & Platforms: Git, GitHub, Postman, Vite, VS Code, Figma

Practices: Agile/Scrum, Debugging, Performance Optimization, Clean Code, Component-Based Architecture, Problem Solving

PROFESSIONAL EXPERIENCE

UI/UX Developer Intern

Jul 2023 – Jan 2024

MPro Technologies — Calicut, Kerala, India

- Created wireframes, interactive prototypes, user flows, and design systems for web applications following UI/UX best practices.
- Improved usability, accessibility, responsive layouts, and visual consistency across multiple application modules.
- Collaborated with development and product teams to translate user requirements and design concepts into functional web interfaces.
- Applied information architecture, interaction design, and usability principles to improve overall user experience.

PROJECTS

Hospiq — Full-Stack Hospital Management Web Application

React.js, Node.js, Express.js, MongoDB, REST APIs, JWT

- Developed a full-stack hospital management platform using React.js, Node.js, Express.js, MongoDB, and REST APIs.
- Implemented role-based authentication and authorization for patients, doctors, staff, and administrative workflows.
- Built patient token booking, doctor scheduling, department-based filtering, electronic medical records, and appointment workflows.
- Implemented real-time token status and queue tracking to help patients and staff monitor appointment progress.
- Developed API integrations for authentication, hospital, doctor, token, medical record, profile, scheduling, and QR-based workflows.
- Applied reusable React components, React Hooks, responsive UI principles, and structured backend architecture with API error handling.

Attendance Management System

React.js, Node.js, Express.js, MongoDB

- Developed a web-based attendance management system with QR-code-based attendance marking and verification workflows.
- Implemented authentication and course management features for instructors and students.

- Integrated frontend and backend REST APIs for attendance records, user authentication, and course-related operations.

Personal Portfolio — Software Engineer and UI/UX Designer

Next.js, React, TypeScript

- Designed and developed a responsive portfolio website using Next.js, React, and TypeScript.
- Built a dual-profile experience combining software engineering and UI/UX design work within a single web application.
- Implemented responsive layouts, interactive UI components, animations, and a performance-focused frontend architecture.

EDUCATION & CERTIFICATIONS

B.Tech in Computer Science and Engineering Jul 2023

APJ Abdul Kalam Technological University, Kerala, India — CGPA 6.98/10 (First Class)

MERN Full Stack Development Jul 2025

JSpiders Training Institute

React JS Certification Jun 2024

Internshala Trainings

ADDITIONAL PROJECTS

- Music Web Application — Developed a dynamic music application with song listings and interactive music-player functionality using React.js and React Hooks.
- Weather Application — Built a weather application integrating external APIs to retrieve and display real-time weather information.
- To-Do Application — Developed a task management application with dynamic task creation, updating, and status management.
- Prisoner Face Identification System — Built a Python-based facial identification and reporting tool using computer vision libraries.

LEADERSHIP & ACTIVITIES

- Webmaster, IEEE Student Branch, CETkr (2020–2021).
- Electronic Communication Coordinator, IEEE Student Branch, CETkr (2021–2023).
- Led the IEEE Design Team for three years and mentored students in UI/UX and graphic design.
- Participated in the IEEE Xtreme 15.0 Coding Competition.
